

OmniWatch

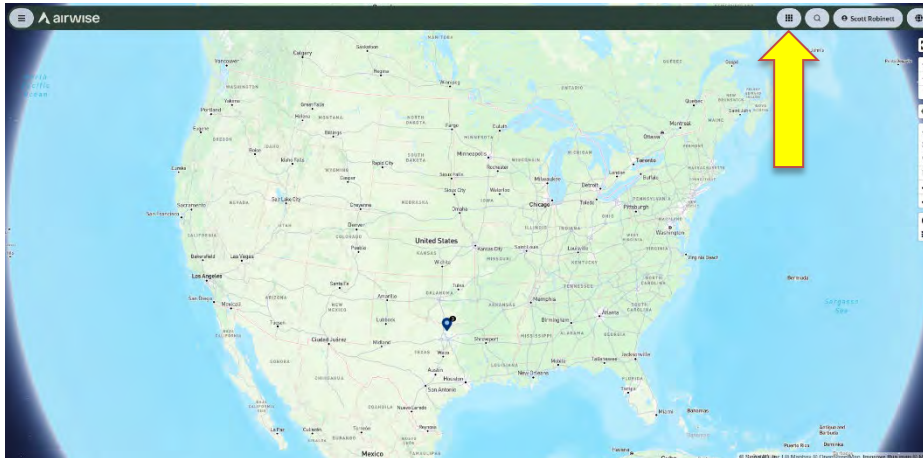

Add Collection

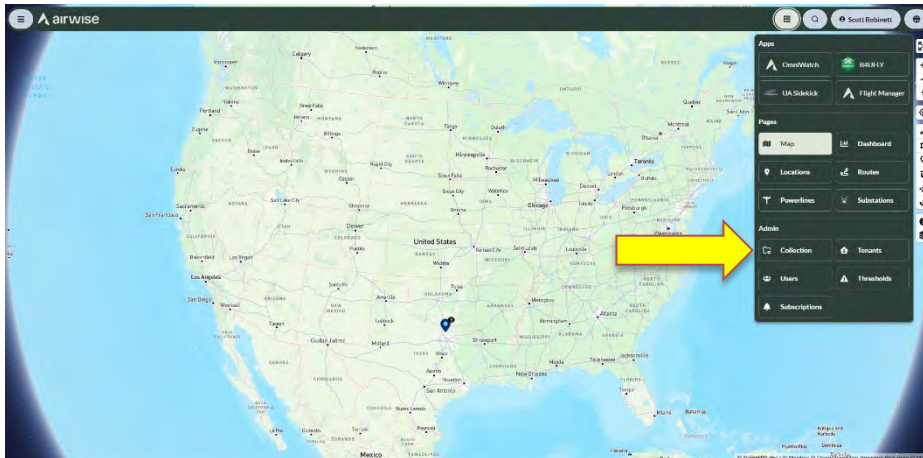

Adding a custom collection to your OmniWatch map allows you to view a wide array of data. The process is to first create a collection and then to import data into that collection.

To Add a Collection:

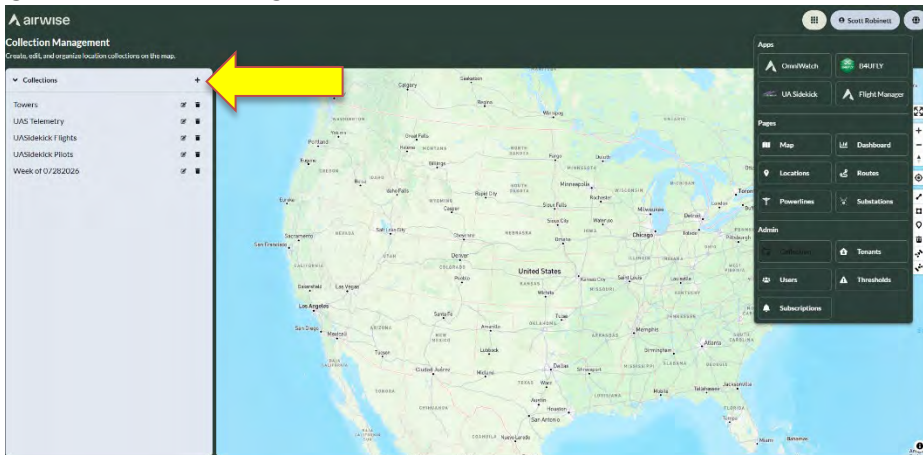

1. Click on the Nine-Dot Menu icon

2. Click on the 'Collection' button

3. Click on the '+' Add Collection icon

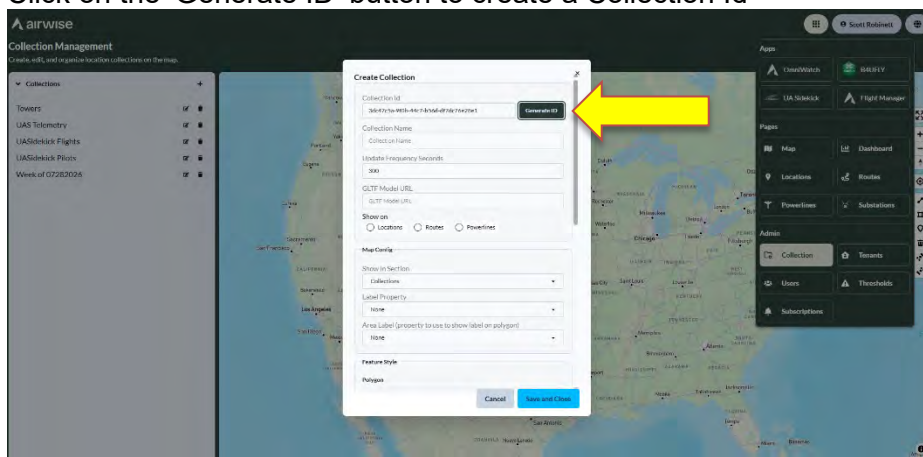

OmniWatch

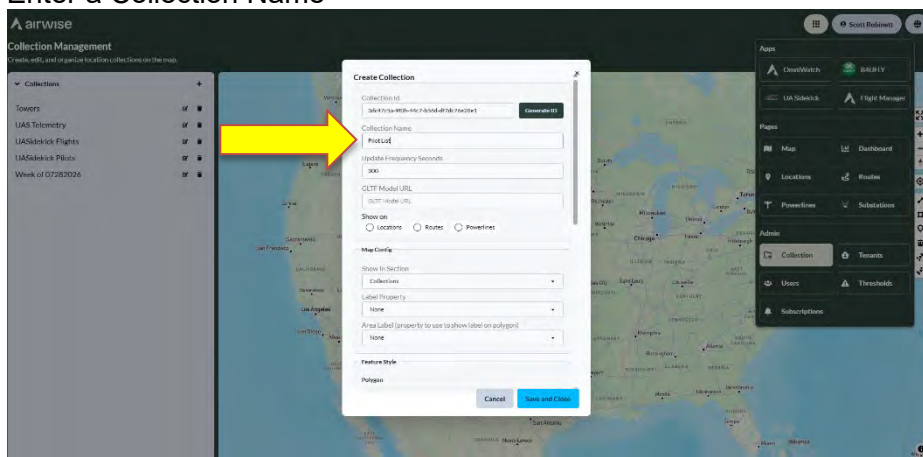

Add Collection

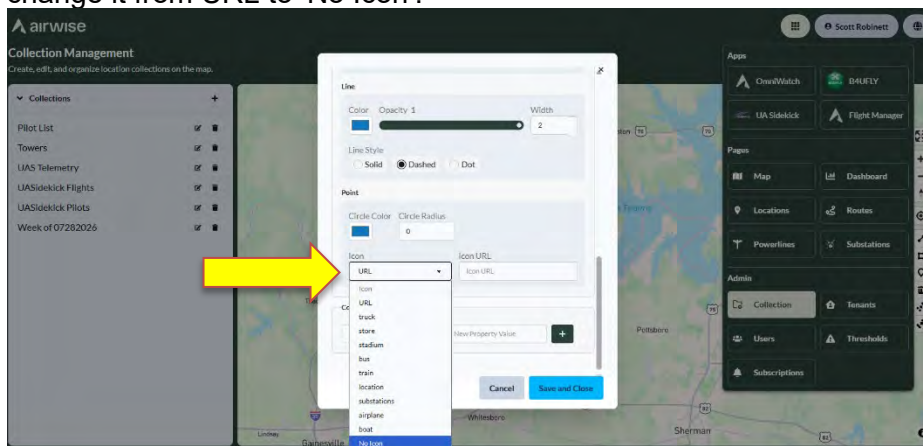

4. Click on the 'Generate ID' button to create a Collection Id

5. Enter a Collection Name

6. If you want to change the color of the marker on the map click on the 'Icon' field and change it from URL to 'No Icon'.

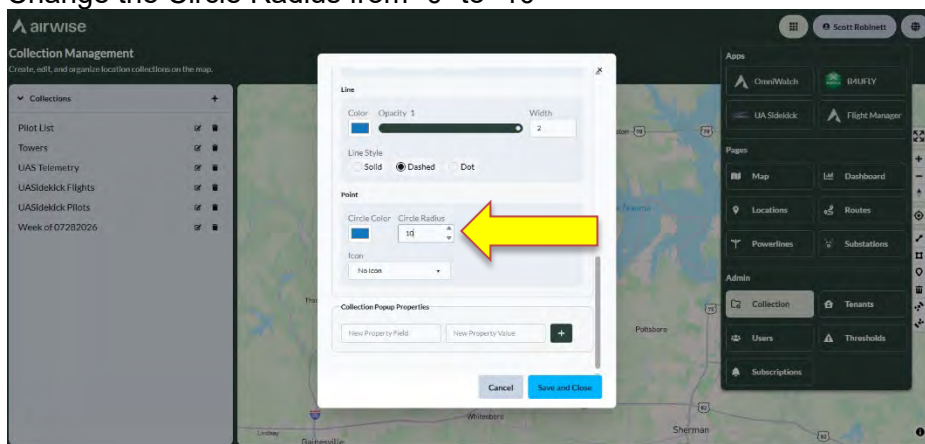

OmniWatch

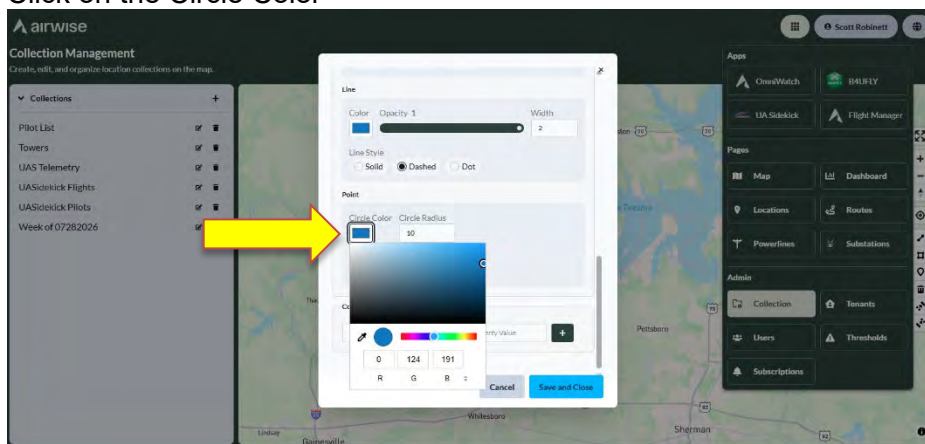

Add Collection

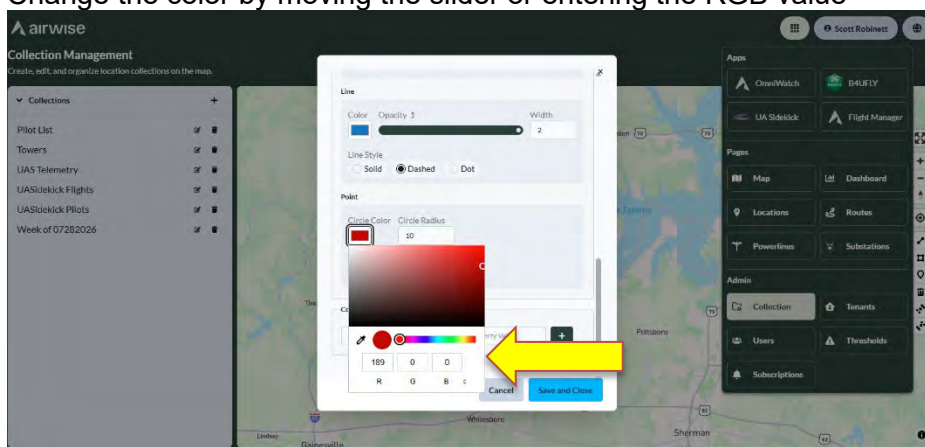

7. Change the Circle Radius from "0" to "10"

8. Click on the Circle Color

9. Change the color by moving the slider or entering the RGB value

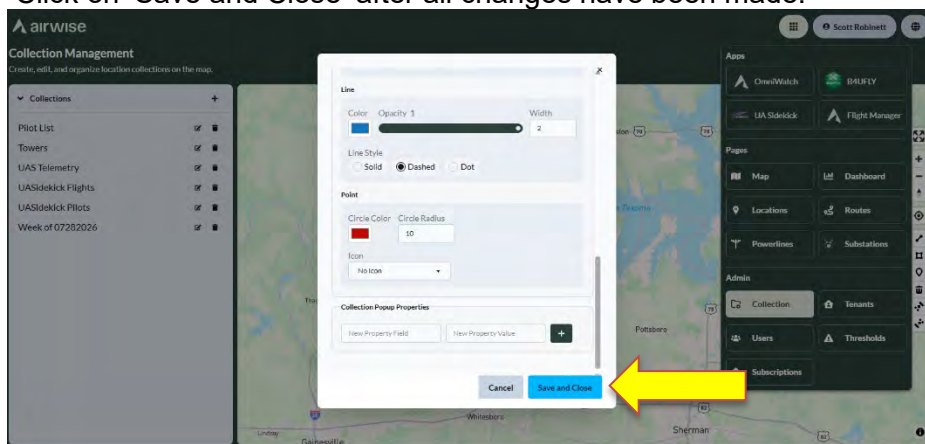

OmniWatch

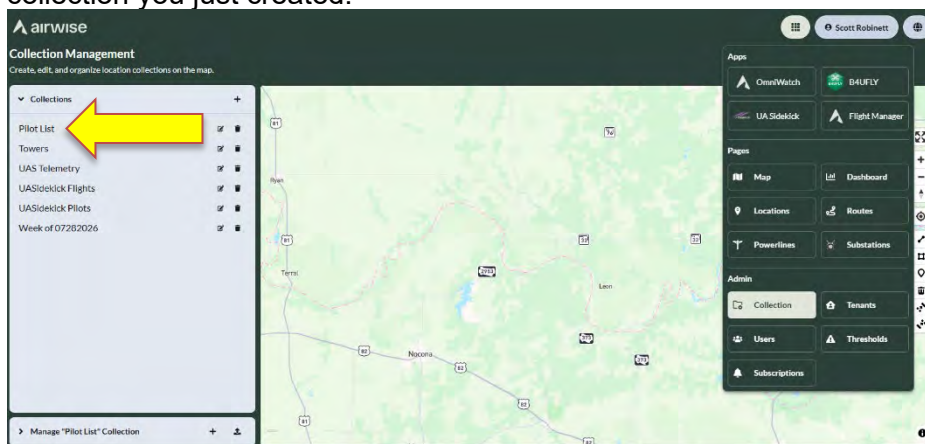

Add Collection

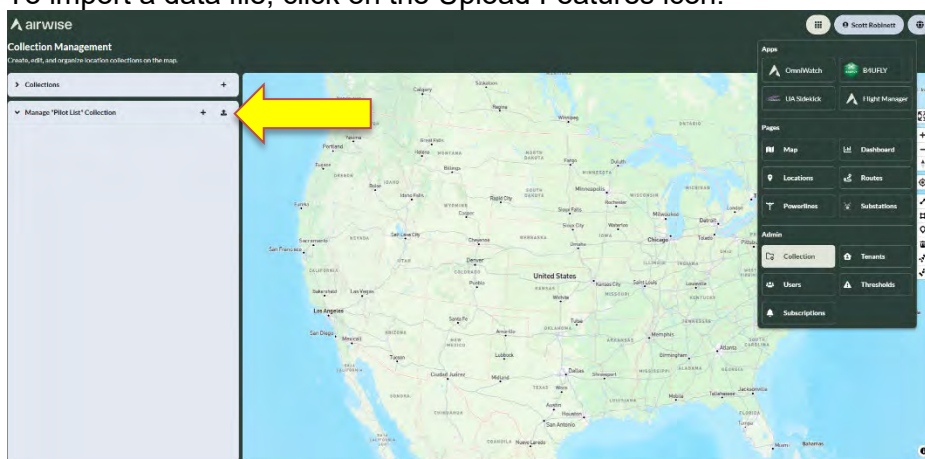

10. Click on 'Save and Close' after all changes have been made.

11. The next step is to import data into the new collection. Click on the name of the collection you just created.

12. To import a data file, click on the Upload Features icon.

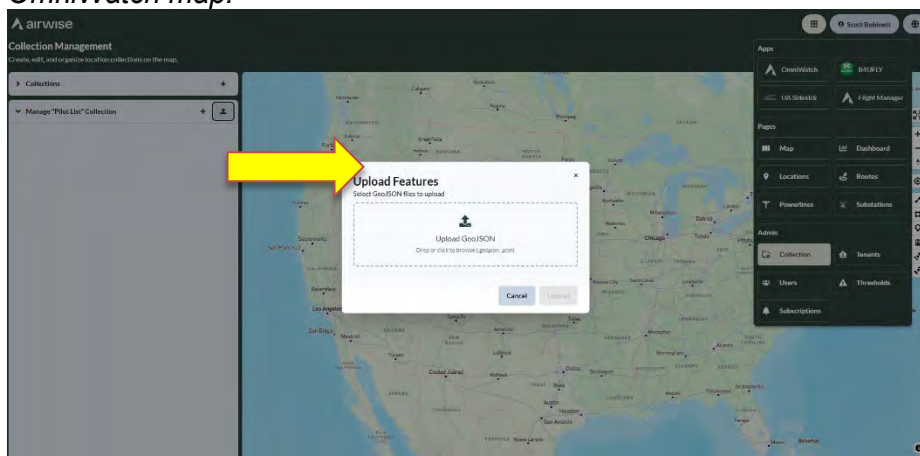

OmniWatch

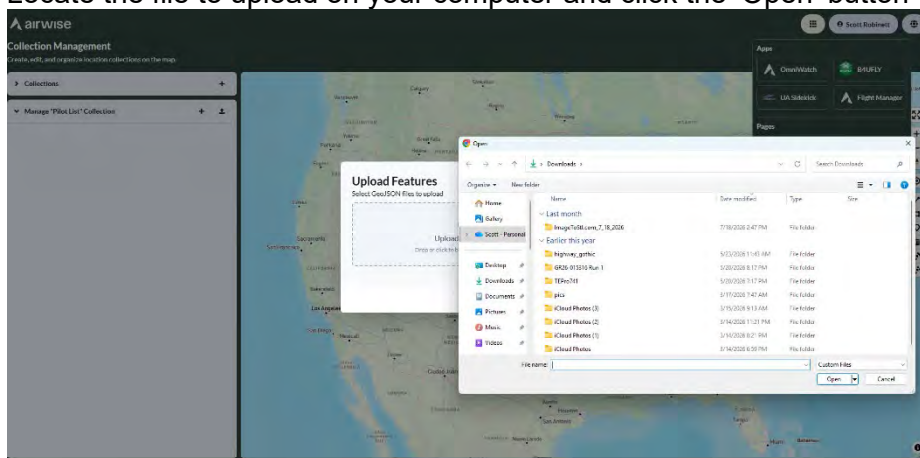

Add Collection

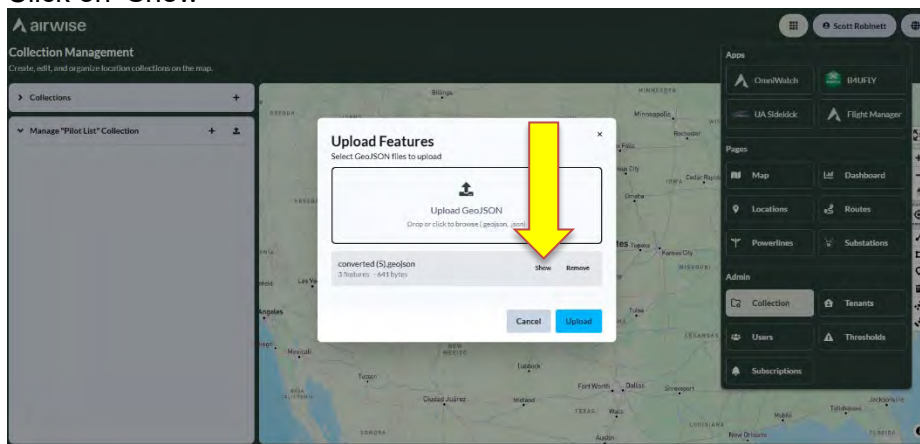

13. Click in the dotted box to upload a GeoJSON file. The file must have Latitude and Longitude. **NOTE**** As of 8/7/26 additional data fields will not be displayed on the OmniWatch map.

14. Locate the file to upload on your computer and click the 'Open' button

15. Click on 'Show'

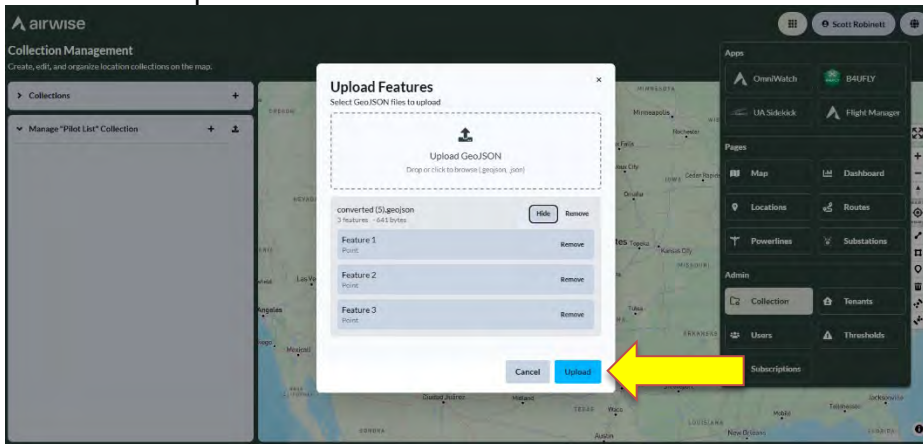

OmniWatch

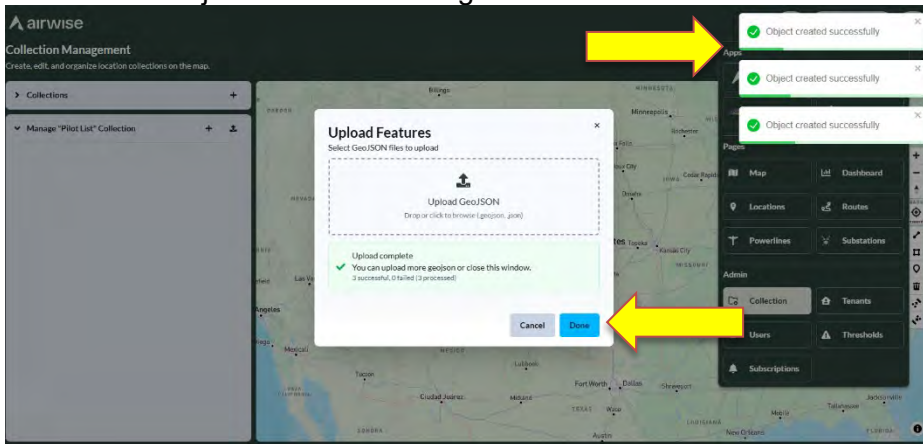

Add Collection

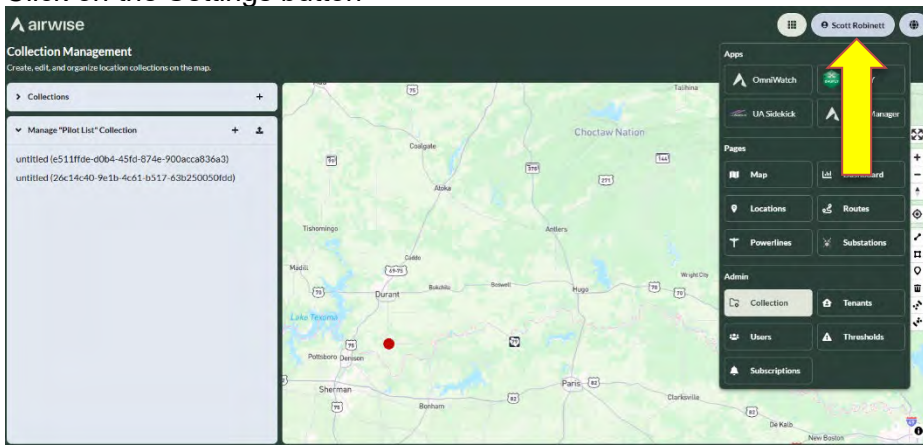

16. Click on the 'Upload' button

17. Wait for the Objects to finish loading then click on the 'Done' button

18. Click on the Settings button

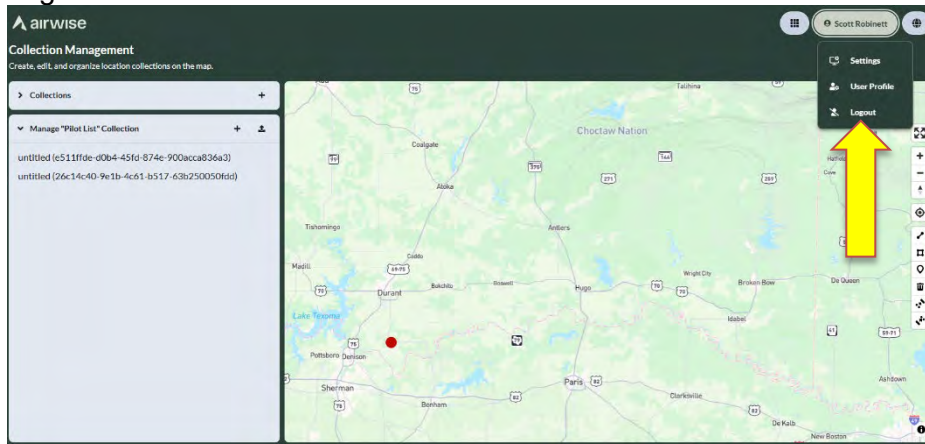

OmniWatch

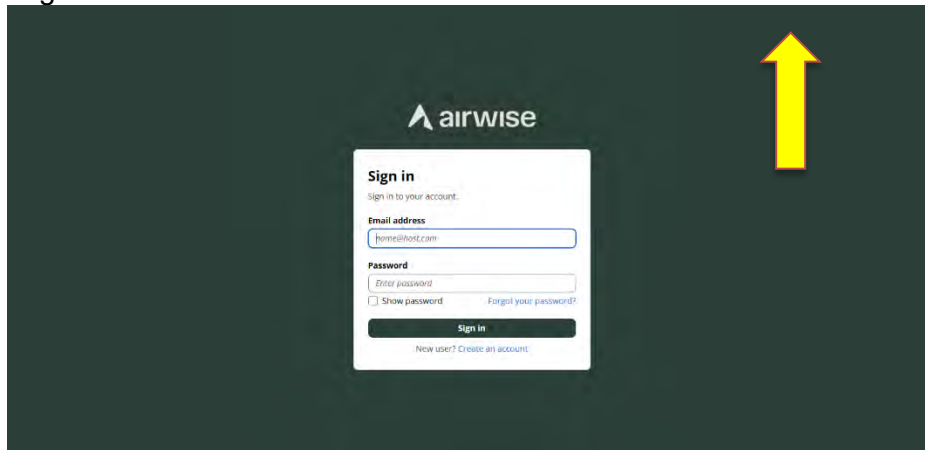

Add Collection

19. Log out of OmniWatch

20. Log back into OmniWatch

21. Your new collection is now available with the other collections in your account
